

a source-drain region connected to said channel region;

a source-drain wiring layer electrically connected to said source-drain region;

[and]

a gate wiring layer electrically connected to said gate electrode,

wherein at least one of the channel region and at least one component part,
having at least one component part provided above or on the channel region, has a portion
outwardly extending therefrom [parts being formed from a conductive film or a
semiconductor film with a heat dissipating extension].

Claim 9, line 1, change "8" to --1--.

Please add new claims 22-24, as follows:

--22. A thin film transistor comprising components of:

a channel region;

a gate electrode opposed to the channel region;

a gate insulating film provided between the channel region and the gate
electrode;

a source-drain region connected to the channel region;

a source-drain wiring layer electrically connected to the source-drain region;

a gate wiring layer electrically connected to the gate electrode,

the channel region having at least one outwardly extending part.--

--23. A thin film transistor comprising components of:

a channel region;

a gate electrode opposed to the channel region;

a gate insulating film provided between the channel region and the gate
electrode;

Amended
a source-drain region connected to the channel region;
a source-drain wiring layer electrically connected to the source-drain region;
a gate wiring layer electrically connected to the gate electrode,
wherein the gate electrode is provided with at least a outwardly extending
portion above the position of the channel region.--

--24. A thin film transistor comprising components of:

a channel region;
a gate electrode opposed to the channel region;
a gate insulating film provided between the channel region and the gate
electrode;
a source-drain region connected to the channel region;
a source-drain wiring layer electrically connected to the source-drain region;
a gate wiring layer electrically connected to the gate electrode,
wherein the components with connecting terminals forming in a line have at
least one outwardly extending part between the connecting terminals.--

REMARKS

Claims 1-4, 7 and 9-24 are pending. By this Amendment, claims 1 and 9 are amended and claims 22-24 are added. No new matter is added. Reconsideration of the above amendments and following remarks is respectfully requested.

Applicants gratefully acknowledge that claims 4-6, 10-13, and 18-21 contain allowable subject matter. However, Applicants respectfully submit that all of claims 1-4, 7 and 9-24 are allowable as noted below.
